

Phosphates - *Do's and Don'ts*

DO'S

- ~DO use our PHOS*free* products with any sanitizer system including: Chlorine, Bromine, Mineral systems, Ionizers, Biguanides and Chlorine Generators
- ~DO use our PHOS*free* products with any filter media: sand, earth and cartridge (be sure to read the how to section on PHOS*free*)
- ~DO swim immediately after applying PHOS*free*: it is gentle on the skin, non-toxic and is 100% safe for the environment.
- ~DO use PHOS*free* products in lakes and ponds (ask your RM for more info)
- ~DO shake all PHOS*free* products to properly mix the ingredients
- ~DO use METAL*free* as your metal chelator of choice as it doesn't add ortho-phosphates to your water.

Clear Perfect
Algae-Free
Water...GUARANTEED

DON'TS

- ~ DON'T add more than recommended amount at one time (see detailed directions for using PHOS*free* products)
- ~ DON'T add to a pool with live algae or a pool that is not clean or balanced
- ~ DON'T add to a dirty filter
- ~ DON'T be afraid to call your regional manager or Natural Chemistry directly with questions or comments on the PHOS*free* program.
- ~ DON'T believe the competition when it says all phosphate removal products are created equal. Natural Chemistry's phosphate removal technology is unique in that it works on the pool filter, making it much more efficient and easy to use.
- ~ DON'T use (unless as a last resort) products loaded with phosphoric acid such as: metal and stain removers, tile and vinyl cleaners, filter cleaners and deck wash; Make sure you read the labels or MSDS. Use METAL*free* as your chelator of choice.
